

Order Automation

- Reduce Costs

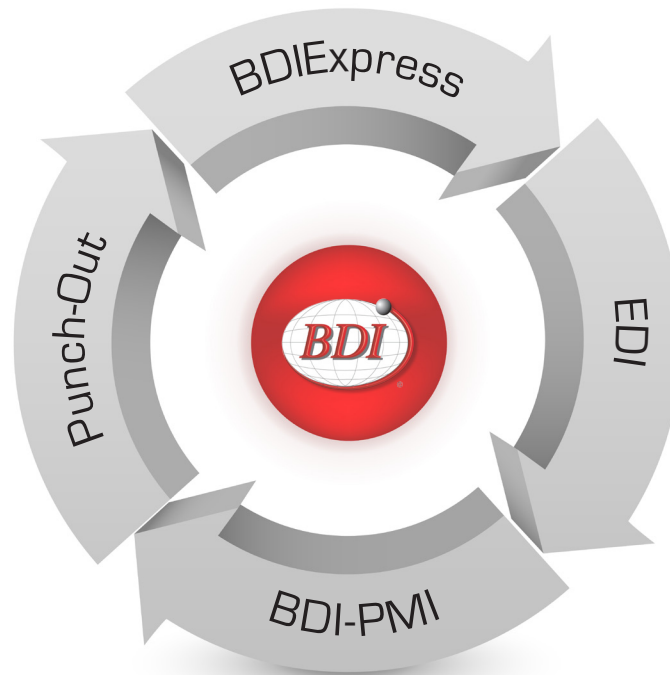

- Improve Efficiency

- Accelerate Parts Availability

Intro

As a valued BDI customer, your time and resources are at the forefront of our designs for process automation. We strive to be the easiest and most streamlined company that you do business with. Period.

We are excited to offer you four convenient ways to streamline the procurement process. We have assembled a series of order automation options that can be used individually or in combination to meet your operational efficiency requirements.

BDI Express

BDIExpress.com is designed with a single goal in mind - to make it as quick and easy as possible for you the customer to procure the products you need. We've streamlined every step of the process, enabling you to search, price, compare and buy thousands of industrial products in real time!

Features/Benefits

- Quick order entry
- Real-time stock check
- Search and track orders
- Invoice history
- Product compare
- Buyer approval controls
- 4 million item catalog

- Personal catalog
- Saved carts
- Search by product attributes
- Alternative (interchange) lookup
- Customer part number search
- Easy quote flip to order
- Mobile applications

Electronic Data Interchange allows the automatic exchange of documents accurately and expediently. Data can be processed in batch or by individual basis, depending on your requirements. As an EDI customer, you can “pick and choose” which documents to exchange based on your needs. Our software collects and processes the data hourly, enabling timely acknowledgement and delivery of both customer and supplier documents.

Features/Benefits

- Interfaces directly to BDI ERP
- Automated contract pricing
- Reduced data entry errors
- Improve inventory positions
- Reduced costs of operations
- Spend/usage analytics
- Reduced back office events

- Complete suite of documents
 - Request for quote (840)
 - Quote (843)
 - Purchase order (850)
 - Blanket PO (830/862)
 - PO Change (860)
 - Order confirmation (855)
 - Advanced ship notice (856)
 - Invoice (810)
 - EFT (820)

PARTNER MANAGED INVENTORY **BDI-PMI**

BDI Partner Managed Inventory powered by SmartMRO provides enterprise visibility for managing MRO inventories across sites, cribs and POU (point-of-use) locations. BDI-PMI is a web-based system that is user-friendly, with an easy-to-navigate interface. The real-time analytics empower managers with essential data to positively impact the bottom line by reducing the overall cost of inventory ownership.

Features/Benefits

- Inventory search functions
- On-the-fly barcode catalogs & labels
- Real-time inventory analytics
- Reduce stock-outs
- Increase inventory visibility
- Pull-based system
- Automated vending machines

PUNCH-OUT

Punch-Out links our web-based ordering site, BDIExpress.com, with your company's purchasing system, eliminating the need for double entry. You enjoy the product search, comparison and pricing features of BDIExpress.com combined with the integrated workflow and order approval capabilities of your own purchasing system.

Features/Benefits

- Order by customer part number
- Real-time stock check
- Easy quote flip to order
- Product compare
- Detailed specifications
- Alternative (interchange) lookup
- Quick and easy checkout
- 4 million item catalog
